

## *Advancing Equitable Cancer Care in the LGBTQ+ Communities*

**Scout, PhD** - Executive Director at National LGBT Cancer Network

**Presentation Description:** Come get an update on what we know about LGBTQ+ cancer disparities, how they impact the mental health of our communities then dive into a series of practical moves that can help build health equity for this underserved population. Get practical examples of how screening and care has gone wrong for this population and what can be done at a structural and interpersonal level to course correct. Learn about a range of new tailored resources you can share with patients and come away with action steps you can take in your practice.

### **Learning Objectives**

1. Describe two ways cancer care issues affect the mental health of LGBTQ+ patients.
2. Enumerate two steps they can take in their daily activities to create a more welcoming patient environment
3. Find at least 3 tailored online resources for LGBTQ+ patients.
